Good catch, Scott!

Max: Please let me know if you have any questions about how to deal with a bug
report in Bugzilla! I believe this is the first one I've passed on to you....

Page has apparently been discontinued by the company so link was eliminated on
/dmt/creo.html page.
Thanks

Max: I changed the Status field above to RESOLVED/FIXED in light of your comment.
If you can remember to do that in the future, great; if not, no big deal.

The next step in this bug's lifecycle is for the submitter to formally test your
fix and change the Status field to either VERIFIED or REOPENED, depending on the
test results.
